DISCLOSURE, HAARP / MANMADE DISASTERS

US Air Force Admits They Can Control the Weather

JUNE 6, 2015 | ADMIN | 124 COMMENTS

The US Air Force and DARPA would like us to believe that they have stopped using HAARP in Alaska for research and experiment. Even then, we all know that there are other HAARP systems out there in the form of radar communication and surveillance systems that are rigged on top of mobile platforms that are deployable in any international waters around the world.

All they need to do is twist a button to change the frequency to microwave range and increase the frequency modulated [FM] transmission power enough to reach and heat up the atmosphere above the target.

The technology is covered under **US Patent 4,686,605** on the “*Method and Apparatus for Altering a Region in the Earth’s Atmosphere, Ionosphere, and/or Magnetosphere.*”

[54] METHOD AND APPARATUS FOR ALTERING A REGION IN THE EARTH'S ATMOSPHERE, IONOSPHERE, AND/OR MAGNETOSPHERE

[75] Inventor: Bernard J. Eastlund, Spring, Tex.

[57] ABSTRACT

A method and apparatus for altering at least one selected region which normally exists above the earth's surface. The region is excited by electron cyclotron resonance heating to thereby increase its charged particle density. In one embodiment, circularly polarized electromagnetic radiation is transmitted upward in a direction substantially parallel to and along a field line which extends through the region of plasma to be altered. The radiation is transmitted at a frequency which excites electron cyclotron resonance to heat and accelerate the charged particles. This increase in energy can cause ionization of neutral particles which are then absorbed as part of the region thereby increasing the charged particle density of the region.

15 Claims, 5 Drawing Figures

How does it work?

For those who have no technical appetite, just imagine the same frequency signal used in your microwave oven that cooks your breakfast...

... is directed towards the atmosphere from the tip of the antennas in the array shown below.

HAARP Array

Again, the same principle used in the TV, or cell site, broadcast is being used on these HAARP and radar platforms. The only difference in cooking up the sky, as opposed to your breakfast, is that the voltage needed to transmit the same microwave frequency signal is in the range of hundreds of million volts due to the amount of distance that the same signal must traverse between the antenna and the target.

While,

“A typical consumer microwave oven consumes 1,100 W AC and produces 700 W of microwave power, an efficiency of 64%. The other 400 W are dissipated as heat, mostly in the magnetron tube.”

... your government's HAARP emitter may need 100 billion watts of sheer power, as the patent above has indicated. There's no theoretical limit, of course, as to how much ego will play into the process.

What could possibly happen to the preselected region in the atmosphere as enough power is fed to the transmission array?

An increase of 1 Celsius in the atmosphere is more than enough to initiate a significant weather perturbation. Bear in mind that all gases move from high to low pressure, and gas pressure is directly proportional to its temperature.

In short, if one heats up at least three points in the atmosphere, the center region having relatively lower pressure than those three heated points will become the eye of the storm. Three competing forces moving towards a common region can only be resolved through a downward spiral rotation, the cooler gases being heavier than the former. Depending on the amount of energy being used, the whole process could take days.

Chemtrailing and cloud seeding could certainly enhance the process far beyond weather manipulation.

For those who understand frequency modulation, they know that any low frequency signal could be piggybacked into the high frequency radio signal. In short, it is possible to alter human behavior by FM broadcasting brain wave frequencies, to wit:

- Delta waves (below 4 hz) occur during sleep
- Theta waves (4-7 hz) are associated with sleep, deep relaxation (like hypnotic relaxation), and visualization
- Alpha waves (8-13 hz) occur when we are relaxed and calm
- Beta waves (13-38 hz) occur when we are actively thinking, problem-solving, etc.
- The Sensory motor rhythm (or SMR; around 14 hz) was originally discovered to prevent seizure activity in cats. SMR activity seems to link brain and body functions.
- Gamma brain waves (39-100 hz) are involved in higher mental activity and consolidation of information. An interesting study has shown that advanced Tibetan meditators produce higher levels of gamma than non-meditators both before and during meditation.

In short, the possibilities are endless using this simple broadcast technology, prompting Tesla to release it to a number of countries after SS George Scherff, Jr. smuggled the electrical plans from the wizard's laboratory.

Other effects of radio transmission

In order to have an idea of how dangerous this technology is when under the control of psychopaths in the government, we need to look at the World Health Organization article about the few of the possible effects of being exposed to radar [1 megawatt] and radio broadcasts [50 kilowatts]:

Possible health effects

Most studies conducted to date examined health effects other than cancer. They probed into physiological and thermoregulatory responses, behavioural changes and effects such as the induction of lens opacities (cataracts) and adverse reproductive outcome following acute exposure to relatively high levels of RF fields. There are also a number of studies that report non-thermal effects, where no appreciable rise in temperature can be measured.

Cancer-related studies: Many epidemiological studies have addressed possible links between exposure to RF and excess risk of cancer. However, because of differences in the design and execution of these studies, their results are difficult to interpret. A number of national and international peer review groups have concluded that there is no clear evidence of links between

RF exposure and excess risk of cancer. WHO has also concluded that there is no convincing scientific evidence that exposure to RF shortens the life span of humans, or that RF is an inducer or promoter of cancer. However, further studies are necessary.

Thermal effects: RF fields have been studied in animals, including primates. The earliest signs of an adverse health consequence, found in animals as the level of RF fields increased, include reduced endurance, aversion of the field and decreased ability to perform mental tasks. These studies also suggest adverse effects may occur in humans subjected to whole body or localized exposure to RF fields sufficient to increase tissue temperatures by greater than 1°C. Possible effects include the induction of eye cataracts, and various physiological and thermoregulatory responses as body temperature increases. These effects are well established and form the scientific basis for restricting occupational and public exposure to RF fields.

Non-thermal effects: Exposure to RF levels too low to involve heating, (i.e., very low SARs), has been reported by several groups to alter calcium ion mobility, which is responsible for transmitting information in tissue cells. However, these effects are not sufficiently established to provide a basis for restricting human exposure.

Pulsed RF fields: Exposure to very intense pulsed RF fields, similar to those used by radar systems, has been reported to suppress the startle response and evoke body movements in conscious mice. In addition, people with normal hearing have perceived pulse RF fields with frequencies between about 200 MHz and 6.5 GHz. This is called the microwave hearing effect. The sound has been variously described as a buzzing, clicking, hissing or popping sound, depending on the RF pulsing characteristics. Prolonged or repeated exposure may be stressful and should be avoided where possible.

RF shocks and burns: At frequencies less than 100 MHz, RF burns or shock may result from charges induced on metallic objects situated near radars. Persons standing in RF fields can also have high local absorption of the fields in areas of their bodies with small cross sectional areas, such as the ankles. In general, because of the higher frequencies that most modern radar systems operate, combined with their small beam widths, the potential for such effects is very small.

- <http://www.who.int/peh-emf/publications/facts/fs226/en/> (<http://www.who.int/peh-emf/publications/facts/fs226/en/>)

However, one must understand that HAARP itself is not evil — but the people who are using it at the moment are.

Here's why according to the same patent:

This invention has a phenomenal variety of possible ramifications and potential future developments. As alluded to earlier, missile or aircraft destruction, deflection, or confusion could result, particularly when relativistic particles are employed. Also, large regions of the atmosphere could be lifted to an unexpectedly high altitude so that missiles encounter unexpected and unplanned drag forces with resultant destruction or deflection of same. Weather modification is possible by, for example, altering upper atmosphere wind patterns or altering solar absorption patterns by constructing one or more plumes of atmospheric particles which will act as a lens or focusing device. Also as alluded to earlier, molecular modifications of the atmosphere can take place so that positive environmental effects can be achieved. Besides actually changing the molecular composition of an atmospheric region, a particular molecule or molecules can be chosen for increased presence. For example, ozone, nitrogen, etc. concentrations in the atmosphere could be artificially increased. Similarly, environmental enhancement could be achieved by causing the breakup of various chemical entities such as carbon dioxide, carbon monoxide, nitrous oxides, and the like. Transportation of entities can also be realized when advantage is taken of the drag effects caused by

In short, they could end their “climate change” stupidity right now by producing enough ozone to replenish that protective layer, reduce carbon monoxide and similar toxic oxides in the atmosphere, etc. and provide adequate rainfall in arid desert in Africa, at will.

They can also eliminate toxicity in the oceans to produce as much planktons as possible, and increase the fisherman’s catch. No more stranded mammals in beaches everywhere.

However, the same people having the capability to control the weather are themselves promoting the “climate change”, or “global warming”, hoaxes. So, how can we expect them to be the solution?

In short, the same people occupying the halls of power are the problem. We need to be the solution. We need to act. Otherwise,

(<https://geopolitics.co/2015/06/06/us-air-force-admits-they-can-control-weather/60aec-geoengineering-methods-infographic/>)

Just three units of these mobile HAARP platforms, masquerading as radars, can make the hurricane steerable by a common method known as *triangulation*.

Unnatural weather patterns suggest HAARP is still here. They may not look like it, but they provide the same function.

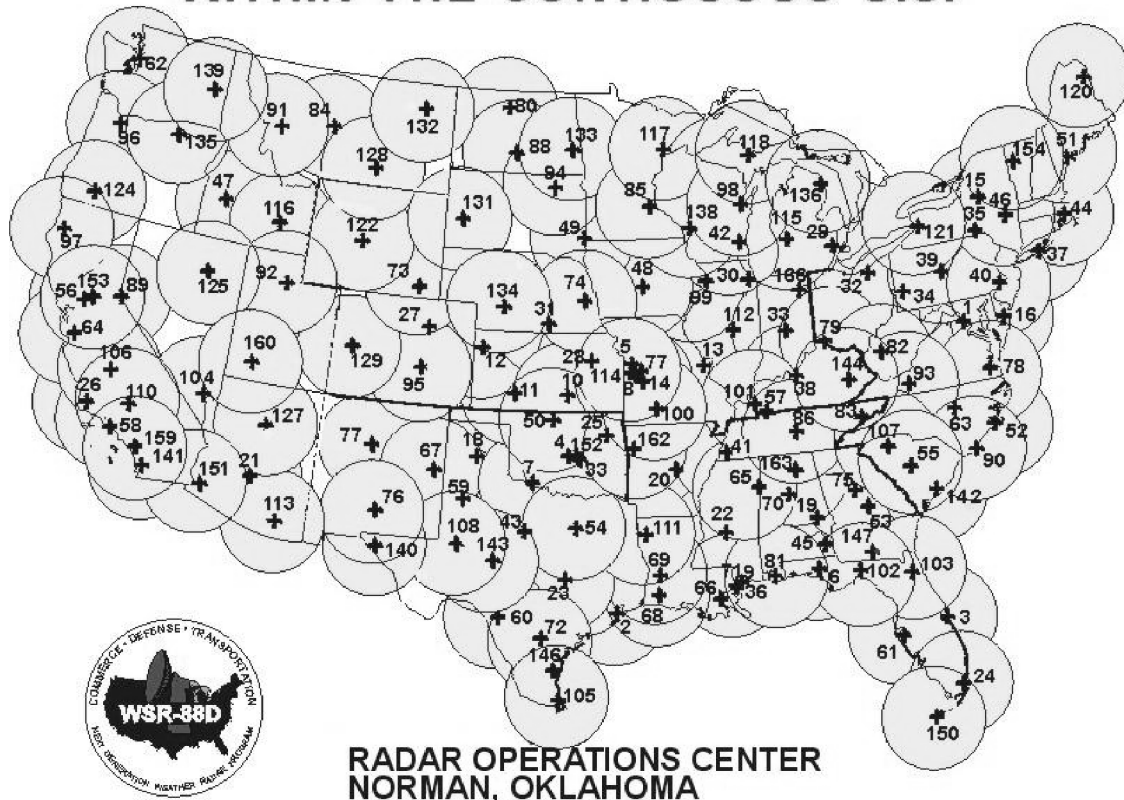

(<https://eclinic.files.wordpress.com/2015/06/labnexrad.jpg>)

Doppler Weather Surveillance Radar

Above is just one of 159 high-resolution **WSR-88D** S-band (<https://en.wikipedia.org/wiki/S-band>) Doppler (https://en.wikipedia.org/wiki/Pulse-Doppler_radar) weather radars (https://en.wikipedia.org/wiki/Weather_radar) scattered in the US mainland that comprise the NEXRAD System, as shown below, and are supposedly to monitor the weather.

COMPLETED WSR-88D INSTALLATIONS WITHIN THE CONTIGUOUS U.S.

(https://eclinic.files.wordpress.com/2015/06/nexrad_network.jpg)

As stated above, the NEXRAD Doppler Weather Surveillance System operates under the S-Band frequency range of 2 – 4 GHz (<https://en.wikipedia.org/wiki/Hertz>) (or 2 – 4 billion pulses per second), which incidentally the same frequency by which our microwave ovens, and other common wireless devices operate.

*The **S band** is a designation by the Institute of Electrical and Electronics Engineers (https://en.wikipedia.org/wiki/Institute_of_Electrical_and_Electronics_Engineers) (IEEE) for a part of the microwave (<https://en.wikipedia.org/wiki/Microwave>) band (https://en.wikipedia.org/wiki/Radio_band) of the electromagnetic spectrum (https://en.wikipedia.org/wiki/Electromagnetic_spectrum) covering frequencies (<https://en.wikipedia.org/wiki/Frequency>) from 2 to 4 gigahertz (<https://en.wikipedia.org/wiki/Gigahertz>) (GHz)... The S band also contains the 2.4–2.483 GHz ISM band (https://en.wikipedia.org/wiki/ISM_band), widely used for low power unlicensed microwave devices such as cordless phones (https://en.wikipedia.org/wiki/Cordless_phone), wireless headphones (Bluetooth (<https://en.wikipedia.org/wiki/Bluetooth>)), wireless networking (https://en.wikipedia.org/wiki/Wireless_networking) (WiFi), garage door openers (https://en.wikipedia.org/wiki/Garage_door_opener), keyless vehicle locks (https://en.wikipedia.org/wiki/Keyless_entry), baby monitors (https://en.wikipedia.org/wiki/Baby_monitor) as well as for medical diathermy (<https://en.wikipedia.org/wiki/Diathermy>) machines and microwave ovens (https://en.wikipedia.org/wiki/Microwave_oven) (typically at 2.495GHz).*

- https://en.wikipedia.org/wiki/S_band (https://en.wikipedia.org/wiki/S_band)

In short, we are not making this all up. Cancer and bad weather are mostly artificially induced at this point in time.

Air Force Bombshell: Admits They Can Control the Weather – HAARP

(<https://eclinic.files.wordpress.com/2015/03/haarp-28.jpg>)

While HAARP and weather control has been called a conspiracy theory by the mainstream media and government officials, during a Senate hearing on Wednesday, David Walker, deputy assistant secretary of the Air Force for science, technology and engineering, dropped a bombshell (<http://www.adn.com/2014/05/14/3470442/air-force-prepares-to-dismantle.html?sp=/99/100/&ihp=1>) in answer to a question asked by Lisa Murkowski in relation to the dismantling of the \$300 million High Frequency Active Auroral Research Program in Gakona this summer.

Walker said this is “not an area that we have any need for in the future” and it would not be a good use of Air Force research funds to keep HAARP going. “We’re moving on to other ways of managing the ionosphere, which the HAARP was really designed to do,” he said. **“To inject energy into the ionosphere to be able to actually control it. But that work has been completed.”**

Many believe HAARP was created and has been used for weather control, with enough juice to trigger hurricanes, tornadoes and earthquakes and comments such as this bring about the question of whether conspiracy theorists are more on target than anyone has admitted to date.

This is not the first time a public official has acknowledged that HAARP and weather control is not only possible, but has been and continues to be, used as a “super weapon,” as evidenced by a statement in 1997 by former U.S. Defense Secretary William Cohen (<http://www.cheniere.org/correspondence/022501.htm>), where he said:

“Others [terrorists] are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves... So there are plenty of ingenious minds out there that are at work finding ways in which they can wreak terror upon other nations...It’s real, and that’s the reason why we have to intensify our [counterterrorism] efforts.”

Is it still just a conspiracy theory if public officials admit it is true?

Watch the question and answer session below:

Murkowski Committee Q&A on HAARP Future

Are they really dismantling the Alaska based HAARP?

How about the floating HAARP transmitters masquerading as mobile radars used in the Philippines?

- U.S. Attacked Philippines with HAARP (<https://geopolitics.co/2014/02/04/u-s-attacked-philippines-using-haarp/>)

High top clearance huh. You were in the guard for four years and faked a back injury as soon as there was any wind of a possible deployment. You have never been any where and you live at home with your dad. Your whole life us a lie and if you keep telling these lies the stolen valor act will catch up with you. Just admit to everyone you are full of it and move on. What would your family think of you if they knew all the lies you have told.

You carry a “HIGH” top secret security clearance? That in itself lends to you know nothing about security clearance. And secondly, even if you DO have some level of a security clearance, that does not give you knowledge of every program in the United States. Gimme a break dude. That is laughable.

Like they are going to tell someone like you of little significance and risk you blabbing about it on the internet just as you are now. Anyone that's in the army is a peon in this game. The ppl that know the real truth aren't out in the fields getting dirty. They're underground protected and cut off from society and all forms of outside communication. Because if the truth were to show itself, there'd be mass riots and complete chaos. Even the president doesn't get this kind of knowledge. So if this is true or not, you don't know shit, except that you think the shit you know is true. And you couldn't be more wrong. If you truly believe that there's not even the remote possibility of anything like this or ideas similar to this, then you're a naive ignorant dumbass and I pity your close mindedness. Probably a Trump supporter. There's a reason he won. Totally rigged just like Bush. And look at all the anarchy and chaotic shit that happened under his presidency. But for my sake and my family's sake, stay dumb and blind, better chance of survival for us with less stupid ppl around like you.

So did I, and I know about it. Knew about it. Aware of it's ability since the early to mid 1900's. Also knew Dept of Aliens, U.S., entered Nicoli Tesla's apartment the day of his death, took out many things; that were left behind by Russian spy's and Hungarian officials. NTK only, so you would have not known. However it's all available to read about. U.S.S. Thresher, submarine, 1963 un-deniably had 100% markings of weather warfare, conducted by USSR. U.S. recently used such a weapon, then has stopped using it, to hide it's existence. It appears the major media was told not to discuss the weapons use, and it's ability. Well, did discuss it's use; but now silence. Putin warned the U.S.; Putin was willing to completely damage American forces at will. Hmmmmmm!

I agree with you Peggy. They have over 2 dozen FEMA DEATH Camps on American Soil, with 40 Million Coffins ready. We have ISIS Terror Compounds as well,.. I believe it's 35 now. They are all armed and ready for Obama to give them the word to attack. There are over 2200+ Mosques in America – the one's that have been raided, Law Enforcement found tunnels under the Mosques leading to massive amounts of Guns, Rockets, Bombs,.. I'm more than positive every Mosque, No go zone and individual homes that these "refugees" stole,.. Are all Armed. Obama and Clinton made sure they were. The ultimate goal is to DEPOPULATE 3 Billion lives in the Western World. They will allow 500 Million to stay alive – which in turn they will be either sex slaves for the women and children, and labor for the able bodied men. Speak up and get this out – with Clinton wanting to bring in 65,000 more and forecasting 100,000 more each year – even if we don't have what's already here causing Destruction on Epic Proportions – Look at Sweden, France, Germany, London, Australia,..etc – you just can't look at the developments happening and by now, haven't figured out that these "Peaceful Refugees" are Terrorist Soldiers with one intention, to kill all Western Civilization and and turn the world into a Islam/Muslim place where their Barbaric Sharia Law will rule. Sharia Law will put women especially at the worst situation of all,.. they will be downgraded to below a rat, beatings are within the law, Rapes and "Honor Killings" will be enforced. If you get "accused" of doing anything, you can be hung, stoned to death, burned to death, beheaded,.. what ever they feel like doing – they will do it without even 1 second of hesitation. Girls 12 – up will more than likely be forced to marry one of these Soldiers, who will then beat, rape, belittle and maybe even killed. Boys – Muslims are Pedophiles, they use boys for pleasure there is no age range as they have killed children as young as a few weeks. They also make arranged marriages for the young girls, toddlers actually – usually 4 and up, where in a lot of cases, they end up with a man 3 – 5 times her age. Unfortunately they are brutally raped and sodomized to the point of death on that very marriage night. If they manage to live – their reproductive functions are very likely destroyed. If they cannot use you to have babies,.. they will probably get sold into sex slavery and will eventually die. From what I understand about the Agenda – they are going to take all the little children from families and be raised by the Government. Those child care facilities are more than likely going to be run by men and women who are very disturbed and are Pedophiles. You can figure out what's in store for those poor babies. Men will be for the most part slaughtered. The one's allowed to live – slaves. If you look up FEMA Executive orders – you will see that you are being run by the Government – they can displace you, take your home, car, anything you cherish and probably throw you in a FEMA DEATH Camp and or killed,.. they can do this for NO particular reason,.. it's you with the clothes on your back. You will no longer be in charge of what you eat, drink or amounts of it. They will enforce MANDATORY "vaccines" which will be poison in some form. This is no joke – this is happening. Think about it,.. does bringing in 65,000 more of these people that want us all dead, make any sense? To a SANE person – of course not. Obama and Clinton are not on our side. Look up Agenda 21 Depopulation. All of the politicians, leaders, etc. that are FOR OPEN BORDERS are all corrupt and under the impression that they will be immune to being a part of the Depopulation amount of 3 Billion that must be exterminated. They aren't, once they have done what Obama and Clinton wants, they have no use. They are dead to. (those people deserve it). Well my friend – I will Pray to God for GOOD to win over EVIL, please do the same. We are at the point of

TRUST NO ONE. Never let anyone take your weapons, if you see someone that looks shady – SHOOT. You Must Profile people now. Don't wait til' they pound down your door – SHOOT. God Bless the World! In Jesus name AMEN. Pray friend.

people have eyes but cant see and people have ears but cant hear do a little research and deploy yourself as a a disciple

if life is such an amusement then pick your side

faith is he who dont lie and the devil meaning evil cant stand the beginning nor the end (genesis and revalation)

so if life is hidden from us its because of our actions where not corrected so we end up w/ deceiving people

we must reconstruct our lives yet if people would buy into their future like counting your blessings before they hatch we could possibly live with god (god is the future) think about it the word convenience is rude and their is so much evil behind that word (i dont want to get into that) but patience opens a view of opportunities

understand the american dream has been controlled for years

if its as simple as feeding a cow grass why not let domestic animals roam they where put here for what to own (wrong)

weve been owned and mentally controlled (a pattern has occured)

we the people have explored and found electricity awesome right

understanding it has been difficult for some people yet we choose to hang it over our heads like candy we want it but dont care who made it so convenient right

FYI if u didnt know static electricity pulls water (plastic materials is the moon possibly and wool is mostly the earth trees,life) no one really knows what the moons really made of but i do know the moon pulls the water like static would so thats my best answer molecules on the surface

so the phenomenon lives on as our lives could be at jeopardy

so much \$ has been invested in this ask donald trump his uncle and father met nikola tesla also trump family was involved in creating a static generator (van-degraaff generator)possible controlling the storm would be a better generator my brother and i have ideas on that conversation w/some more understanding and info of errors its like starting at the bottom w all previous mistakes to happen again government info must be replayed because getting info from them is like history replaying itself hidden from the main agenda us the people if i could create a storm wouldnt u think some idiotic person try it (hidden from us isnt good and us knowing isnt good either)idk im not a

O.o

I know when poor Tesla died, they took all his work and the contents of his safe. Must have been pretty important stuff. He experimented with the ionosphere too, he did have some dangerous accidents lol but even tesla was talking about drawing free energy from the atmospheres. What with being a humanitarian, who cared about the world and its people. They see no gain from free energy. But they sure was interested in his work to use to their advantage. When good work gets into the wrong hands, hell breaks loose. He was on to something big, far bigger, things beyond what we think are impossible. Amazing person who deserves more recognition. The world needs more humanitarian Tesla's.

Walker said "We're moving on to other ways of managing the ionosphere, which the HAARP was really designed to do"

The Air Force admits that HAARP affects the ionosphere, what has this to do with weather control.

HAARP is a means to manage the ionosphere, not the troposphere.

The ionosphere is the layer of the Earth's atmosphere that is ionized by solar and cosmic radiation. It lies 75-1000 km (46-621 miles) above the Earth.

The troposphere is the lowest layer of Earth's atmosphere and site of all weather on Earth. The troposphere is bonded on the top by a layer of air called the tropopause, which separates the troposphere from the stratosphere, and on bottom by the surface of the Earth.

All weather occurs only in the troposphere.

HAARP affects only the ionosphere.

The distance traveled by an electrical signal depends on its electrical pressure [V], i.e. the higher the voltage [V] the farther the distance reached by that signal.

If your 3-volt remote control could change your TV channel it doesn't mean you can change your neighbor's TV channel across the road.

If HAARP could reach the ionosphere, why not the troposphere which, as you said, is nearer?

All the HAARP operator needs to do is lower the transmission voltage from 200 million volts to 100 or 50 million volts by twisting a single knob.

A Tesla "death ray" may need a different frequency with the same amount of voltage as HAARP, but your car's spark plug only needs 40kv to 100kv to force that quarter inch gap of atmosphere to become conductive.

By comparison, FM radio transmitters broadcast at 50kw power while HAARP is about 4 billion watts minimum according to its patent.

Altering the ionosphere TOTALLY alters ALL the levels below it. As the quote in the article from Bill Clinton's Secretary of Defense William Cohen stated, weather modification not only exists, our enemies use it. Furthermore, you can read about Russia using the technology to clear Malaysia of smoke after a forest fire back in the 1980's. Shortly after that the UN passed a resolution banning weather modification as a weapon of warfare. Surely we are not expected to believe the UN would pass a world-wide resolution based on what some sheeple think is a conspiracy theory.

I'm not ameteorologist, but I am familiar with enough physics that I find this merits questions. First: define "controllable." Even if there were some means of influencing a hurricane's path, they wouldn't just be able to reverse it, because of inertia. Second: define "control." When people say "control the weather," it conjures up images of TPTB deciding just how the weather should act that day, and implementing it. This ability to micromanage is not possible: for one, the Navier-Stokes equations, which model fluid flow, by necessity also model turbulence (it

would make a lousy model if they didn't describe all known phenomena). This means the equations (which, by the way, haven't been solved) have chaotic solutions, and so we can't always even predict the result of a given action. This is why I find the language misleading; but "influence the weather" doesn't sound nearly so ominous, does it?

If you google hurricanes that actually were steered in a circle pattern, you'll see that they did so & bragged about how well it worked. Now that Harvey has flooded Houston, try counting how many times it drifted back into the gulf to pick up more water & then return to land to dump it.

There are many H.A.A.R.P. arrays on U.S. (Rothschild) military ships around the world. So closing one array is nothing. And we must wonder WHY they are closing it. I'm sure it's for even more nefarious reasons than keeping it running.

Weather modification has been used for warfare purposes since at least the 1960's – Operation Popeye: cloud-seeding was used over the Ho Chi Minh trail in Vietnam to slow down the enemy and that's not even the tip of the iceberg. It's all there in the declassified documents for anyone who has a brain to see. It's not a "conspiracy theory" – it's been openly acknowledged for decades.

Hey oscar,

These radar installations and mobile ship radar platforms are what is creating and directing the direction of the hurricanes. Not saying every event is man made, but lots have questionable aspects and can be linked to the x band ship being deployed to the Philippines as there are 2 HAARP installations in Japan. The patent uses three beams to steer the storm cell.

Michael, ultimately influence and control are virtually the same- it's more so the context that you view the term "control". The weather works on its own, just like your mind isn't telling you to breathe. The point is that if they would like a "natural" event to Happen, they can make it happen – when and where. Sure they can't turn a hurricane around, but why would you even try? How would that look natural lol. Also the point is to create a weakened country so they need to lean on ol Uncle Sam and their friends at the world bank and IMF. Similar events to this recently would be the sudden earth quake that struck China's super computer.... wow, how fortunate for the USA if the worlds fastest super computer(China's) were critically damaged or even just taken offline for awhile

Seriously, send two gigawatts of electricity to ground in Louisiana for 24 hours and you get 3/4 inches of rain over an area of 100,000+ square miles. It's been happening in the U.S. since January 2013. It started shortly after this happened. (Ask yourself, "What happens when thousands of mobile devices text "The second half just started" at the Superbowl all at the same time? http://www.espn.com/nfl/playoffs/2012/story/_id/8911864/2013-super-bowl-power-outage-stops-game-super-bowl-xxviii)

Why would anyone want to control the weather? That could kill all the fish in the ocean or all the birds in the sky. The food chain, that we depend on for survival, could very quickly be wiped out. You cannot live without food.

From a private revelation: And it shall come to pass in the last days, saith God, I will pour out of my Spirit ... and your young men shall see visions, and your old men shall have dreams;

Message from the Lord Jesus to John Leary – 2011 & 2012; Before HAARP was used against the Philippines and other Asia Countries;

“My people, on the weather programs, on television, you can see the continuous whirlpools of great storms that constantly come across America from the Pacific Ocean. The HAARP machine is in an ideal position in Alaska to influence the weather conditions of the Pacific Ocean.”

“You have an exceptionally snowy and extremely cold winter as in previous years. It is a known fact from the internet information that the HAARP machine can heat the ionosphere to modify the jet streams that control your climate. It is these manipulations of storms that can increase the amount of precipitation, and bring to America cold air masses from Canada.”

“Even though many people have spoken about the disasters caused by the HAARP machine, there are no open protests to stop these manipulations. Pray that the misuse of this machine will be more widely disseminated so that people can complain more forcefully of the damage caused by earthquakes and bad weather attributable to the HAARP machine.”

“My people, the promoters of Babel’s globalism can cause catastrophes – or brandish disasters as a means of pressure – against any country of their choice. They used the HAARP machine to cause major earthquakes worldwide.”

“Where they caused earthquakes of magnitude 8 to 9, the tsunamis managed to cause more damage. This vision [given to JL] is that of another strong earthquake in the Pacific that will trigger a new wave of tsunamis. Scientists have an early warning system set up to warn people of all tsunamis in the Pacific, but there will only be a short warning period, as the waves of the tsunami travel very quickly.”

“All countries along the Pacific coast of Asia should be ready for another major event.”

THEN CAME THE DISASTERS AS WE KNOW IT!

K my turn guys...there have always and always will be some self esteemed bright spark wannabes in any and every form of gov't position whether it be pen pushing in the CIA or feet on the ground at an AF base,etc. The 007 fantasy that manifested in Ian Fleming's imagination (he had a very boring job in reality BTW)

is embedded via the movies in the minds of losers with zero actual life excitement all over the globe,etc,etc !

I am not familiar with HAARP but if it's anything like the Roswell conspiracy then it would have been experimental at best because leaks are always inevitable and even the SEAL's can't resist the hero exposure thru BS books these days !

Back to UFO's in all the decades of hyped up theories including UFO crashes near NM and aliens stored at Wright Patterson base in Ohio there is yet to be a single shred of convincing evidence or FOX,etc would be paying a \$\$\$fortune to buy it as an exclusive !

Military nobodies are prone to exaggerations to impress the ladies,etc and there's few out there who are not Audi Murphy legends in their own minds...same goes for cops (many are also ex military)

Tom Clancy made a fortune as did other creative best seller list authors playing on peoples superstitions and paranoias,etc and so the BS continues in the media and rumor mongering within military and gov't circles about amazing scientific discoveries that never happened in

reality and even if experimentation existed never concluded with any REAL beneficial results only wasting more taxpayers \$\$\$!

But don't worry about the future folks because brilliant obese species like Kim Jong Un has BIG plans for everyone and all those top security cleared geniuses can't even seem to figure out HOW to STOP people like that !

From a paper written in 1996 called : "Weather as a Force Multiplier:

Owning the Weather in 2025".

Appropriate application of weather-modification can provide battlespace

dominance to a degree never before imagined. In the future, such operations will enhance air and space superiority and provide new options for battlespace shaping and battlespace awareness.

1 "The technology is there, waiting for us to pull it all together;" – in 2025 we can "own the Weather."

2 "Besides the significant benefits an operational capability would provide, another motivation to pursue weather-modification is to deter and counter potential

adversaries”.

Scenario: Meteorological analysis reveals that equatorial South America typically has afternoon thunderstorms on a daily basis throughout the year. Our intelligence has confirmed that cartel pilots are reluctant to fly in or near thunderstorms. Therefore, our weather force support element (WFSE), which is a part of the commander in chief’s (CINC) air operations center (AOC), is tasked to forecast storm paths and trigger or

intensify thunderstorm cells over critical target areas that the enemy must defend with their aircraft. Since our aircraft in 2025 have all-weather capability, the thunderstorm threat is minimal to our forces, and we can effectively and decisively control the sky over the target.

3 Within the next three decades, the concept of weather-modification could expand to include the ability to shape weather patterns by influencing their determining factors.

4 In the broadest sense, weather-modification can be divided into two major categories: suppression and intensification of weather patterns. In extreme cases, it might involve the creation of completely new weather patterns, attenuation or control of severe storms, or even alteration of global climate on a far-reaching and/or

long-lasting scale.

5 The number of specific intervention methodologies is limited only by the imagination, but with few exceptions they involve infusing either energy or chemicals into the meteorological process in the right way, at the right place and time. The intervention could be designed to modify the weather in a number of ways, such as influencing clouds and precipitation, storm intensity, climate, space, or fog.

And so it goes on....

It is real folks, but the other sinister motive is outer space but that’s another matter and a longer story.

With so much information about Geoengineering, weather modification, weather warfare, aerosol spraying, smart dust, Geoengineering patents, Geoengineering bills in congress, and so much more all on government websites most people are still in the dark about this. The disinformation campaign to discredit anyone who tries to have an adult conversation about the science of weather modification is labeled a NUT instantly. We’re all in this together and

we're all gonna die of cancer before the bulk of the population realizes that we are being poisoned by the United Nations and THE UNITED STATES. They have already established a global system for this.
